This supplemental data represents a new “target average” established March 11, 2026.

California Agri data represents the average of three reference samples per each of the 3 mills run on 03/26/2026.

FGIS/QAS and BAR data represent the average of three reference samples each.

BAR = Board of Appeals and Review, Kansas City, MO.

FGIS/QAS = Federal Grain Inspection Service / Quality Assurance Specialist, West Sacramento, CA.

All samples were from the same reference sample batch and were run just after warm-up.

Brown Rice measurements included for this survey period were using the Yamamoto Sheller.
